

EAGLE OCEAN MARINE CIRCULAR

FEBRUARY 11, 2025

TO ALL INSUREDS AND BROKERS

Dear Colleagues:

REVISED MARITIME TRAFFIC REGULATIONS FOR THE TURKISH STRAITS: AN UPDATE

Reference is made to the Eagle Ocean Marine Circular, [Revised Maritime Traffic Regulations for the Turkish Straits](#), of January 6, 2025, that highlights new safety of navigation regulations that took effect on February 1, 2025. In addition to the requirements of the that Alert:

- Prior to submission of the required SP-2 report to the Turkish Straits Vessel Traffic Service (TBGTH) two hours or twenty miles (32 kilometers) before entering the Turkish Straits, Masters should ensure that their vessels are technically fit as set forth in Annex 2 of the revised version of the Directive on Maritime Traffic Regulations for the Turkish Straits, [Check List for Technical Conditions of Ships Passing Through the Turkish Straits](#). The Master is to sign the Check List and the pilot will confirm compliance upon boarding the vessel.
- Vessels shall report to the TBGTH center — via phone, fax or VHF— any technical deficiencies including any deficiencies of their navigational systems, and any non-compliance with the conditions of the Check List which may jeopardize the ability to navigate safely. Any vessel that fails to report such conditions will be subject to legal action.

Eagle Ocean Marine recommends that Insureds take note of this information and be guided accordingly. We thank our correspondent Vitsan Mumessillik ve Musalvirlik, A.S. for their assistance on this topic and for providing the information upon which this Alert has been based.

Yours faithfully,

Dorothea Ioannou, CEO
Eagle Ocean Agencies, Inc.
